SELF-APPRAISAL AND STUDENT PERSONNEL SERVICES, AMERICAN RIVER JUNIOR COLLEGE. A DEVELOPMENTAL CENTER. FINAL REPORT. (TITLE SUPPLIED).

BY- AUGHINBAUGH, LORINE A.

PUB DATE 10 MAR 65

EDRS PRICE MF-\$0.50 HC-\$4.28 107P.

DESCRIPTORS- \*JUNIOR COLLEGES, \*STUDENT PERSONNEL SERVICES, \*PROGRAM EVALUATION, \*SELF EVALUATION, SACRAMENTO, AMERICAN RIVER JUNIOR COLLEGE

THE PURPOSE OF THE STUDY WAS TO GATHER INFORMATION ABOUT THE PROGRAM OF STUDENT PERSONNEL SERVICES AND TO DEVELOP A METHOD FOR SELF-EVALUATION TO BE ADAPTED TO OTHER JUNIOR COLLEGE SITUATIONS. THE "INVENTORY OF STAFF RESOURCES OF SELECTED COLLEGE FUNCTIONS" WAS SELECTED FOR THE STUDY FRAMEWORK TO BE COMPLETED BY 31 STAFF MEMBERS REPRESENTING A CROSS-SECTION OF THE TOTAL STAFF. THIRTY-FIVE FUNCTIONS ARE IDENTIFIED AND DESCRIBED AS TO NEED, SCOPE, QUALITY, AND OPERATIONAL CLASSIFICATION. A SUMMARY REPORT FORM FOR EACH FUNCTION IS REPRODUCED. THE PROGRAM AT AMERICAN RIVER JUNIOR COLLEGE IS WIDE IN SCOPE AND OF BETTER THAN AVERAGE QUALITY. IMPROVEMENT IS NEEDED IN INTERPRETATION AND UNDERSTANDING BY STAFF, IN DEFINITION OF JOB ASSIGNMENTS AND RESPONSIBILITIES, AND IN THE PERFORMANCE OF SERVICE AND INTEGRATIVE FUNCTIONS. PROCEDURAL CHANGES APPEAR TO POSE A PERSONAL THREAT TO SOME PERSONNEL AND DIFFERENCES OF OPINION ARE ACCOMPANIED BY UNEXPECTED AMOUNTS OF EMOTIONAL OVERTONES. RECOMMENDATIONS FOR IMPROVEMENT ARE PRESENTED FOR EACH AREA. (WO)

## **FINAL REPORT**

### **SELF APPRAISAL - STUDENT PERSONNEL SERVICES**

#### **AMERICAN RIVER JUNIOR COLLEGE**

American River Junior College was selected as one of the six junior colleges in the United States to serve as a "Developmental Center" by the National Committee for the Appraisal and Development of Junior College Student Personnel Programs under the sponsorship of the American Association of Junior Colleges and the Carnegie Corporation of New York. The first request of each of the six centers by the National Committee was to conduct a self-appraisal of student personnel service in as much depth as possible.

As each of the colleges selected was known to have a well developed student personnel program, the centers were instructed that the methods and procedures by which the self study was to be conducted was of greater interest to the National Committee than was the actual data to be collected. Nevertheless, what was to be learned through the study continued to be of major concern at this developmental center. It is anticipated, however, that other junior colleges may be able to profit from the process used to conduct the study.

This report includes:

- A. Brief developmental background of the college and the student personnel program.
- B. General plan for the self appraisal study
- C. Self-appraisal Data
  - 1. Functions
  - 2. Staff Resources
- D. Conclusions and recommendations

## Developmental Background of American River Junior College

A belief "in the intrinsic worth of the individual" and a belief that "education in a free society should provide training in skills appropriate to the individual's abilities, and an environment in which to develop those attitudes toward life and society which result in a higher degree of mental, emotional, and social maturity"<sup>(1)</sup> served as the guiding philosophy of American River Junior College on its organization in 1955. The words appeared, and still do, in a statement of educational philosophy in the Board of Trustees Policy Manual, in the Accreditation Application of 1957 and 1963, and in each Annual Report of the Superintendent.

Provisions to implement the beliefs were built into the organizational structure, as the two major areas of student personnel services were developed.

Counseling. "During his first semester in the college, each student is expected to enroll in an introductory psychology course. The instructor becomes his counselor for his entire stay in the college."<sup>(2)</sup> The decision to employ psychology instructors who were also qualified educational counselors was based on the belief that each student would thus have an opportunity better to understand himself and his intrinsic worth through (a) the content of a course in psychology, and (b) the establishment of a relationship with at least one member of the faculty which could be continued throughout his enrollment at the college.

Student Activities. Believing that "in a complex and dynamic society ideas are as essential as facts" and that an individual "must have available an environment which stimulates the discovery, exchange, and transmission of ideas"<sup>(3)</sup> a co-curricular program of student activities was established.

- 
- (1) American River Junior College District Policies and Procedures Manual, August '63
  - (2) American River Junior College Catalog, 1964-65, page 33
  - (3) ARJC Application for Accreditation, March 1963, page 11

Total student participation was, and is, a goal of the college. The Board of Trustees took action to implement the goal by approving (a) a weekly schedule which delegates the hours from 11:00 to 1:00 on Wednesday and Friday of each week for club and student association activities, and (b) the assignment of each faculty member to some facet of the co-curricular program. The Board of Trustees has also supported cultural enrichment programs initiated by student groups.

Many changes have occurred during the ten years of the college's existence including an increase in student day enrollment from 533 to 4150; night enrollment from 1689 to 4200; day faculty from 37 to 155; night faculty from 51 to 153; and from rented facilities located in one of the lower socio-economic level areas of the district to a site of 153 acres in a suburban residential area. In spite of these changes, the founding concepts remain unchanges and their implementation through student personnel programs continues to be a basic part of the institution's functions.

The nature of a community in which, and by which, a college is established affects directly or indirectly every facet of the college program. A self study of student personnel functions at American River Junior College must take into consideration this community influence.

The college district covers a 292 square mile area, including nearly all of Sacramento County north and west of the American River. There are 15 community clusters in the district, all unincorporated except for three which have recently been annexed to the City of Sacramento. The underlying school districts feeding into the junior college include over 100 elementary schools and 24 junior and senior high schools. Originally an agricultural area, the district has become primarily a residential community. Most of the citrus and olive groves and grain fields have given way to residential building -

first individual homes, then housing tracts, and most recently duplexes and apartment houses. Many shopping centers have been developed to serve the residential sections. The ARJC district, mainly suburban to Sacramento, encompasses many of the higher-priced residential sections in Sacramento County.

The region has been one of the most rapidly growing areas in California. Its population has more than tripled since 1950, from 81,846 to an estimated 300,000 today. The assessed valuation of the district today stands at \$429,499,930. During the life of the college this has represented an average annual increase of 19 percent over each preceding year. In-migration has brought a tremendous increase in school enrollment at all levels. For example, where one high school district had a single high school in 1950 it now has eight.

Each semester a "Characteristics of Day College Students" <sup>(4) (5)</sup> report is prepared by the Records Office. A comparison of some of the material contained in the Fall, 1959 and the Fall, 1964 reports reflect trends and changes in the student population which may tend to alter student personnel procedures. See Appendix A.

There have been several changes in the administrative structure and personnel during the life of the college and each change has had its effect upon the student personnel program. In 1955 the traditional positions of Dean of Men and Dean of Women were part of the structure, in 1958 the two were combined into one position, that of Dean of Student Activities and a new position of Dean of Guidance and Records was created. Later the work

---

(4) ARJC "Characteristics of Day College Students" - Fall 1959

(5) ARJC "Characteristics of Day College Students" - Fall 1964

of the Dean of Guidance and Records was absorbed by the Dean of Instruction and the Division Chairman for Counseling and Psychology. In July, 1964, the position of Dean of Student Personnel, long overdue, was approved by the Board of Trustees and for the first time all activities related to students have been brought together under one full time administrator. See Appendix B.

## General Plan for Self-Appraisal Study

When asked to do a self study, there was little question about the scope or quality of the total program. There was some concern, however, about the understanding of the program on the part of the current administration, the faculty, and the students. As new members had been added to the student personnel staff some question arose as to their assimilation into the avowed philosophy of student personnel at American River Junior College. There was also some question about the extent to which we were obligated, or could afford, to offer certain auxiliary student personnel functions. How vital were they to the students?

We were asked to have the study completed by March 15, 1965. Our starting date was determined by the initial visit of the Project Director, Dr. James Nelson, on October 27, 1964. This was very close to the beginning of pressure on a large part of our student personnel staff attendant upon end-of-fall semester and start-of-spring semester. We were faced with the practical necessity of doing what was possible in the time available.

### 1. Study Design

Many questions had to be decided quickly. Should we develop a questionnaire or use material already prepared? Should we attempt a total canvass of the entire staff or work only with members of the student personnel staff? Should students be included? Should we sample personnel staff, faculty, administration and students? Should we cover the entire area of student personnel or select certain specific areas for study in depth? How would the material be collected? Could data be machine processed? How should data be reported? The questions centered around who, how, and what and were answered finally in the following ways.

- a. The Inventory of Staff Resources of Selected College Functions<sup>(6)</sup> was selected as the framework for the study. The cumulative research behind the Inventory, its recency, its availability, and its applicability to the junior college were all factors in its selection.
- b. Selection of staff to complete inventories.

Although the present ARJC faculty numbers over 150, only 31 copies of the instrument were available at the time it was necessary to start the study. It was decided that the participants should represent as diversified talents as possible, and staff members in their first year of employment would not be included.

Three teams were selected:

a general evaluation team; each of whom would complete a copy of the inventory.

a student personnel staff team, each of whom would complete a copy of the inventory as well as collecting empirical evidence when possible on assigned items, and

a report and analysis team, whose members would not complete an inventory, but who would be responsible for developing a tabulation and report form, as well as summarizing the data on the inventories completed by the other two teams.

The composition of the three teams was as follows:

---

(6) Raines, Max, Inventory of Staff Resources of Selected College Functions, October, 1964

**(1) General Evaluation Team:**

**(a) Ten Faculty Members**

- 1) Eight Division Chairmen
- 2) Chairman of Faculty Senate
- 3) President of Faculty Association

**(b) Ten Counselors**

- 1) Nine day counselors (½time psychology instructors)
- 2) One evening counselor

**(c) The President of Student Body**

**(d) Three Administrators**

- 1) District Superintendent
- 2) Dean of Instruction
- 3) Director of Public Information

**(2) Student Personnel Staff Team:**

**(a) Dean of Student Personnel Services**

**(b) Associate Dean of Student Activities**

**(c) Coordinator of Student Activities**

**(d) Recorder (member of Classified Staff)**

**(e) Chairman of Psychology Division (also a counselor)**

**(f) Counselor (Participant in Student Orientation Programs)**

**(g) School Nurse**

**(3) Report and Analysis Team:**

- (a) Three counselors - trained in experimental research methods - two on staff two years - one on staff seven years.**

(b) One Division Chairman - Social Science (formerly a counselor and dean of men) instructor in statistics, on staff ten years.

(c) One Developmental Center Coordinator - Coordinator of Counseling, on staff nine years.

c. It was also decided that the request for assistance on the self-analysis study should be presented in such a way that the project would be understood to have official college sanction. Accordingly, the Dean of Student Personnel Services <sup>(7)</sup> invited all selected staff members to attend a meeting in the Faculty House at 2:00 p.m. on November 23, 1964. Those who were unable to attend were asked to indicate if they were interested so they could be contacted later. All but six were in attendance and all of these six indicated an interest in participation. They were interviewed the following day by the Center Coordinator.

The meeting was turned over by the Dean of Student Personnel Services to the Center Coordinator, who

(1) Reviewed the purpose and plans of the National Study Committee for Appraisal and Development of Junior College Student Personnel Work.

(2) Outlined plans for the American River Junior College Self Analysis Study.

(3) Explained the team assignments:

(a) All General Evaluation Team members were to complete the yellow pages of the Inventory. It was strongly recommended that Division Chairmen and presidents of

---

(7) See Appendix C

organizations complete their inventories with the assistance of others in their division or organization. Group participation would increase the number of people involved and make it possible for some in-service training in the functions of student personnel.

All counselors on the team were to complete the green personal information section as well.

- (b) Each Student Personnel Team member was to complete the entire form, green and yellow sections, and to provide empirical evidence whenever possible on the functions assigned to him for special study. The Center Coordinator delegated each function to the team member judged to be most closely related to the function or to one who supervised others who were. (A few of the functions were exchanged among members of the team as the study progressed.)

(4) Set Deadlines for Reports:

- (a) December 4, 1964 for General Evaluation Team
- (b) December 9, 1964 for Student Personnel Team

- (5) Asked that all reports be returned to Dean's office marked; faculty, student personnel, administration, or student.

- (6) Explained that the green personal section would be removed prior to tabulation of the yellow pages as some questions were raised about the confidentiality of replies turned in by student personnel staff.

- d. The Report and Analysis Committee met several times prior to the December 4, 1964 deadline;

- (1) To discuss and determine methods for tabulating the reports to be submitted by the General Evaluation Team and the Student Personnel Staff Team. Although data processing equipment was available on campus, staff and machine time were not available during this period. The college was in the process of converting many student record functions to the new 1620 program. Therefore, much of the tabulation had to be done by hand and this reduced the types of information which were sought.

The two major groups of replies were from student personnel workers and from faculty members. Each of the 31 replies to the 35 items on the Inventory was separated according to group and then tabulated. The percentage of similar replies was computed. It was expected that the heart of the study would lie in evidence of agreement or disagreement in staff perceptions, studied in relation to existing empirical evidence concerning the effectiveness of certain procedures and their acceptance or rejection by the staff.

- (2) To develop a form which would contain the following information for each of the 35 functions delineated in the Inventory:
  - (a) List the function
  - (b) Quote the staff assignment of function (if available)  
from the ARJC Board Policy Manual or the ARJC Accreditation Report.
  - (c) Summarize the procedure for implementation as currently practiced at American River Junior College

- (d) Report the reaction of various staff groups to the quality, scope, etc., of the function at ARJC
  - 1) as tabulated from completed inventories
  - 2) as summarized from comments about function from completed inventories.
- (e) Compare the rating of the Student Personnel group with the frequencies reported on the revised "Developmental Guidelines" wherever possible.
- (f) Present whatever empirical evidence is available in support of (4a), (4b), or opposed to (4a), (4b).
- (g) Recommend:
  - 1) Continuation of function as is
  - 2) Deletion
  - 3) Expansion
  - 4) Change of procedure
  - 5) Other

During the early part of January 1965, a report sheet for each function was developed (Appendix D) and the 35 functions were divided among four members of the Report and Analysis Team for study and report. The fifth member of the group worked on a summary of the personal data material submitted by 15 student personnel respondents. After the completion of the study of the first 15 functions, the form was redesigned. The revised form has been used to report the data prepared from the material gathered by the Research and Analysis Team in C-1.

## Self Appraisal Data

### 1. Functions

The Inventory of Staff Resrouces of Selected College Functions booklet was distributed as planned to 31 members of the staff and student body. Thirty of the forms were returned by December 9, 1964 and the tally of the results was completed prior to Christmas vacation by the four members of the Report and Analysis Team. One of the student personnel reports was not returned in time to be included due to illness of the expected participant.

The Inventory given to the President of the Student Body was completed by a group of student council members in a special evening meeting called by the president. The student replies have been included, therefore, as a representative group reaction and have been quite helpful in adding one more dimension to the self study of student personnel function at American River Junior College.

Points to consider when reviewing the data sheets which follow:

- a. The percentage of replies for the three groups came from a different base; Administrative - 3, Faculty - 10 and Student Personnel - 16.
- b. The Guidelines Summary was not as complete or as useful as had been expected when the comparison was planned for each function.
- c. A competent student personnel staff may tend to down-grade its own performance in light of its high personal expectancies.
- d. The lack of total student personnel involvement in certain student personnel functions must be viewed against the specialized assignments of part of the staff members, i.e., some are counselors and some are student activity specialists.

## 2. Staff Resources

The personnel data sections of the original inventory were reviewed and summarized by the one member of the Report and Analysis Team - (Division Chairman, Social Science) - who was not a member of the current student personnel staff. It was felt that summary of the staff strengths and weaknesses done by a relatively uninvolved participant would shed some information which could be used in the following ways:

- a. In future student personnel recruitment practices
- b. As a basis for in-service training programs
- c. As a further source of information which might make more meaningful certain student personnel reaction reported in C-1.

Schedule of Classes, Spring 1965

7. Recommendations:

Regular meetings are held to review practices and procedures. These efforts should be continued to refine and improve all segments of the Student Registration Function, although it is far superior to the usual program. Additions to IBM Hardware should be made as soon as financially possible.

Submitted by Lorine Aughinbaugh

Date February 15, 1965

Selected Student Personnel Function Number VII

1. Function title The Personnel Records Function
2. Function Assigned to Dean of Student Personnel, Coordinator of Counseling, Counselor

3. Current implementation at ARJC (Summarize) A student folder is prepared when the student completes the first admission requirement. Before admitting the student, the jacket contains his transcript from high school and all colleges previously attended, and a guidance record showing placement test scores.

The folder remains with the student's counselor for the duration of his enrollment. During this time, all communications to and from faculty and student are filed in the folder, as well as anecdotal record kept by counselor. The information builds a fairly complete record of the individual's scholastic record.

However, for future employment and senior college questionnaires, it would be helpful to have a more complete record of employment in the folder.

Based upon written policy Yes where Board Policy Manual accepted practice

4a. Reaction to function	NEED	SCOPE	QUALITY	OPER. CLASS.

Stu.		100% B	100% G	SP 100%

Comment summary - Administration (66% Not involved) No comment

Student Personnel (56% involved) As a counselor, I receive assistance from the nurse - students do also. We have a nurse on duty during regular semester calendar. A well staffed Health Center is open during the school day. We are advised of student illnesses and frequently consulted regarding health problems.

Faculty (80% not involved) Don't know how periodic or how detailed an appraisal is accomplished. Bulk of students live at home so this type of program is not vital.

Students (Not involved) At the time of registration health papers must be completed by each student. The health records are kept current throughout the school year.

**High School Liaison Counselor Assignment Sheet**

(Comment Summary - Administration - cont'd from page 1)

The division personnel have joint meetings with their counterparts at the local high school level and at the local college level. Each feeder high school is provided with a liaison counselor, and coordinating committees are maintained between the college and the high schools. A coordinating committee designs a meaningful, non-repetitive calendar of cultural and social events. These activities serve both the community and the student body. Informal contact is made with the high schools and the former students at senior colleges to evaluate the junior college program (Future plans call for a stronger program of followup of our former students)

(Comment Summary - Student Personnel - cont'd from page 1)

We could increase articulation with junior college graduates, as well as inter division articulation. We could also increase and improve our articulation with the feeder high schools. There is an apparent need to develop and improve contact with our former students in senior colleges. We do make an attempt to entertain our high school counselors, but more effort could be made in this area.

7. Recommendations:

As the function has a wide assignment base, as committees are many and broad in scope, there is a need for better communication and understanding among all staff members as to their responsibility for program articulation. There is need for more direct coordination in this area.

A real need is also seen in the lack of follow up of former students. As soon as possible time should be made available to selected staff members to visit students at senior colleges and universities.

Selected Student Personnel Function Number XXXIV

1. Function title The In-Service Educational Function

2. Function Assigned to Dean of Instruction

3. Current implementation at ARJC (Summarize)  
The Dean of Instruction develops an in-service training program for all new staff each year, as well as a leadership development program for all administrative staff. Each division chairman is responsible for in-service training in his division. The Coordinator of Counseling develops the in-service training activities as they are requested and needed by the counseling staff. Staff committees develop and work on special projects as needed.

Based upon written policy Yes where Board Policy Manual accepted practice

## SUMMARY OF STAFF RESOURCES INVENTORY

Fifteen student personnel staff members at American River Junior College completed the Staff Resource Inventory; these included the nurse, eleven counselors, and three student personnel administrators. Stability of the staff is indicated by the number of years they have held their present position: two years, one; three years, five; four years, four; five, six and seven years each, one; nine years, two. Previous positions which these staff members held included teacher, counselor, nurse, social worker, probation officer, research specialist, and salesman.

All of the above are full time college staff members, all are employed 50% or more in student personnel activities and all classify themselves as professional student personnel workers. Three came to our staff from university teaching and student personnel work, the rest from teaching and student personnel work in secondary and elementary schools.

Batchelor degrees; five from the University of California, two from San Francisco State, and one each from University of Colorado, Colorado State, Miami University, Long Island University, City College of New York, South Eastern State University, and the University of Texas. The undergraduate major for five of the fifteen was psychology, with others in fields of engineering, business, nursing, physical education, history, social science and math. Three received degrees between 1930-34, two between 1935-39, six between 1945-49, three between 1950-54, one between 1955-59. All are mature individuals who have had a least fifteen or more years of training and experience following the receipt of the Batchelor's degree. Thirteen of the fifteen hold a Master's degree, one has a Ph.N., one will complete a Master of Arts degree in the near future. All have

taken advanced graduate work or attended a specialized workshop in the field since 1962. All of the counselors hold a California Pupil Personnel Credential.

During their training, ten of the fifteen staff members had been enrolled in a supervised practicum, seven in the area of counseling and three in student personnel and counseling. Distribution of graduate credits show 12 had work in interview techniques, nine in clinical testing, 13 in educational testing, nine in group guidance, and 11 in occupational information. Fourteen had completed cognate courses, thirteen research methodology courses, and eight in junior college education courses. Their choice of most significant course was either counseling practicum or counseling psychology.

Twenty-eight professional organizations were listed and it is to be noted that seven were members of the American Personnel and Guidance Association, eight of Sacramento Area Personnel and Guidance Association, four of the California Counseling and Guidance Association and two of the California Junior College Student Personnel Association. Two belong to the American Psychological Association, three to the Sacramento Valley Psychological Association and one each to California Psychologists Association and the Western Psychologists Association. Attendance at professional conferences would indicate that membership in the above organizations is active, not passive. Eleven staff members had attended a national conference within the past three years, ten a regional conference, and twelve a state conference.

If training, experience, and professional interest can be used as criteria for a competent staff, the American River Junior College student

personnel staff members who completed the questionnaire are a superior group in every way. The members of the Research and Analysis Team and the first year staff members who did not complete the Staff Resources Inventory also have comparable experience and educational backgrounds.

## **Summary and Recommendations**

The data collected on each of the thirty-five student personnel functions as presented in the inventory was found to be too diverse to be really helpful in its present form. Following a suggestion made by Dr. Max Raines at the 1965 February meeting of Center Coordinators in Los Angeles, the functions have been grouped into the following seven areas for purposes of study and recommendation:

Orientation  
Appraisal  
Control  
Consultative  
Involvement  
Service  
Integrative

### **1. Orientation**

The functions under this heading include pre-college information, student inductive, occupational information (including what the college offers) and group orientation.

There was general agreement that the pre-college information and group orienting functions are broad in scope and good in quality, although continued development will be necessary to keep programs alive. The students feel that the student inductive function was broad and good but the administrators, faculty and student personnel staff all agreed that improvement was needed. The use of student assistants during the summer was recommended.

Had the Occupational Information function been divided into information about what the college offers and information about future

careers which students are given while in college, the ratings might have been quite different. Students are given a great deal of information about what is offered by the high school counselor, by the junior college counselors, and by the faculty in academic areas. However, the function was rated as fair or poor by everyone when rated on the basis of career information given to students in attendance. The specific recommendation given at the end of function XI should be carefully studied.

2. Appraisal

The functions under this heading include educational testing, applicant approval, personal records, health appraisal, and basic skill diagnosis.

The appraisal functions are all rated broad in scope and good in quality. Recommendations in this area include 1) more research related to the data collected, 2) more clerical assistance in personal record area (counseling) and 3) more information given to entire faculty about the health appraisal function of the American River Health Center.

3. Control

The functions under this heading include student registration, academic regulatory and social regulatory.

Registration was rated broad in scope and good in quality, even by the students. The academic regulatory function was well understood, but the student personnel staff expressed a desire for more involvement in the recommendation of academic standards and procedures. The social regulatory function, which is normally handled by the students themselves under the direction of the Associate Dean of Students, was rated less high than the other areas of control except by the students themselves.

It was evident from the comments that the total program of social control is not well understood by the college staff and it may be that information rather than change is indicated.

4. Consultative

The functions under this heading include the applicant consulting function, the student advisory function, and the student counseling function.

All respondents agreed that the scope of the student applicant function was very broad and very good, but faculty felt that more subject area specialists should be used to assist in pre-registration counseling. The same comments were noted under the student advisory system; however, the administration and the students were in agreement that this function was both broad and good.

The student counseling function was rated high by everyone but the student personnel staff doing the work. Either this is a reflection of a competent staff's desire to do an even better piece of work or it is a reflection of a philosophical difference. The members of the staff who have been clinically trained, tend to feel that counseling is an activity which should be reserved for students with personal problems while others feel that all students should be provided with educational, vocational, and personal counseling.

5. Involvement

The functions under this heading include the co-curricular, student self government, citizenship activities, recreational activities, and athletics.

There was almost unanimous agreement that the co-curricular student

government, and athletic programs are broad in scope and good in quality. The lower ratings on both recreational and citizenship activities would suggest that careful study should be given to these areas.

In the recreational area it is recommended that a survey be conducted to determine if American River Junior College should take a greater responsibility in this area. Students living at home may be participating in recreational activities not connected with the college, but through other community groups.

Although the entire staff is responsible for the development of "citizenship attitudes", the reexamination of this primary function is strongly urged. An attempt should be made to determine if the "subtle or indirect approach" is more productive than would be the case if more direct responsibility were given to faculty and administration for its development.

#### 6. Services

The functions under this heading include financial assistance and scholarship awards; placement, both cooperative and graduate; health, educative and clinical; housing, on and off campus; basic skill development; and non-student counseling.

In general, the functions listed under this category show the greatest need for study and development. Need will have to be determined and the expenditure of funds for these purposes will have to be justified.

Scholarship awarding was the only function truly rated as broad in scope and good in quality. Financial assistance was also rated fairly high, but when reading the comments it became apparent that it was

rated on the basis of the presence on the campus of a full-time employee of the state department of employment who places as many students as possible in part-time jobs. Financial assistance of grants, loans, and work-study programs were not the criteria considered.

One striking difference of opinion appeared in the health educative function. The administration and student personnel staff rated it high while the faculty and students scored it either fair or poor. The difference may be more closely related to an understanding of the function (all students are required by law to take a course in hygiene) than to its actual implementation.

The same type of difference seemed to exist also in the basic skill development function. Students felt it was very well covered, while only three-fourths of the faculty and student personnel staff and one-third of the administrative staff concurred. To what extent this program should be expanded at the junior college level will need to be balanced by other community resources.

#### 6. Integrative

The functions under this heading include program articulating function, alumni supportive function, in-service training, student personnel evaluation, and the administrative organizational function.

In all of the above functions the ratings were less high (usually fair or poor) and there was less consensus about the function and its implementation.

The faculty and student personnel staff feel we need a great deal more information about what happens to our graduates. A stronger

alumni program might supply some of this information. Faculty, especially, felt that more time should be spent in articulation, especially with senior colleges. Student personnel felt more needed to be done on an intra-campus level.

Although the administrative organizational function was rated rather high by most respondents, the comments indicated the thinking had been directed toward general rather than student personnel administration. Confusion on this topic is quite clear when one student personnel staff member answered that not only did we not have an administrative organization but none was needed!

## GENERAL SUMMARY

The student personnel self-study at American River Junior College confirmed the fact that the program is wide in scope and of better than average quality. It is better understood by all segments of the college population than had been formerly assumed, but there are areas where real effort is still needed in interpretation and understanding. The Service and Integrative Functions need a great deal more study and development as many functions under these two categories either are not done at all, or if done, are not of the scope and quality of the rest of the program. Research was recommended in many areas; possible need for student recreational facilities, development of local normative test data, strengthening vocational and career activities, current implementation of citizenship development, and the need for a continual program of evaluation of all facets of the American River program, through follow-up study of our graduates.

In addition to the specific recommendations for program improvement as outlined above, some related information was gained which also may influence administrative action in the future; (a) job assignments are not as complete or as well spelled out in all areas as had been supposed, (b) the difference of opinion among certain members of the student personnel staff carries more emotional overtones than had been anticipated. Some members wish to move forward too rapidly and make changes without reference to past experience, and (c) there appears to be an inability of other members to accept procedural changes without feeling a sense of personal threat. All changes recommended will have to take into consideration the understanding and reaction of the entire staff.

If any or all of the above recommendations are undertaken as a result of this student personnel self-study, the time and effort expended will have been more than worthwhile. A better than average program will be given an opportunity to move toward excellence.

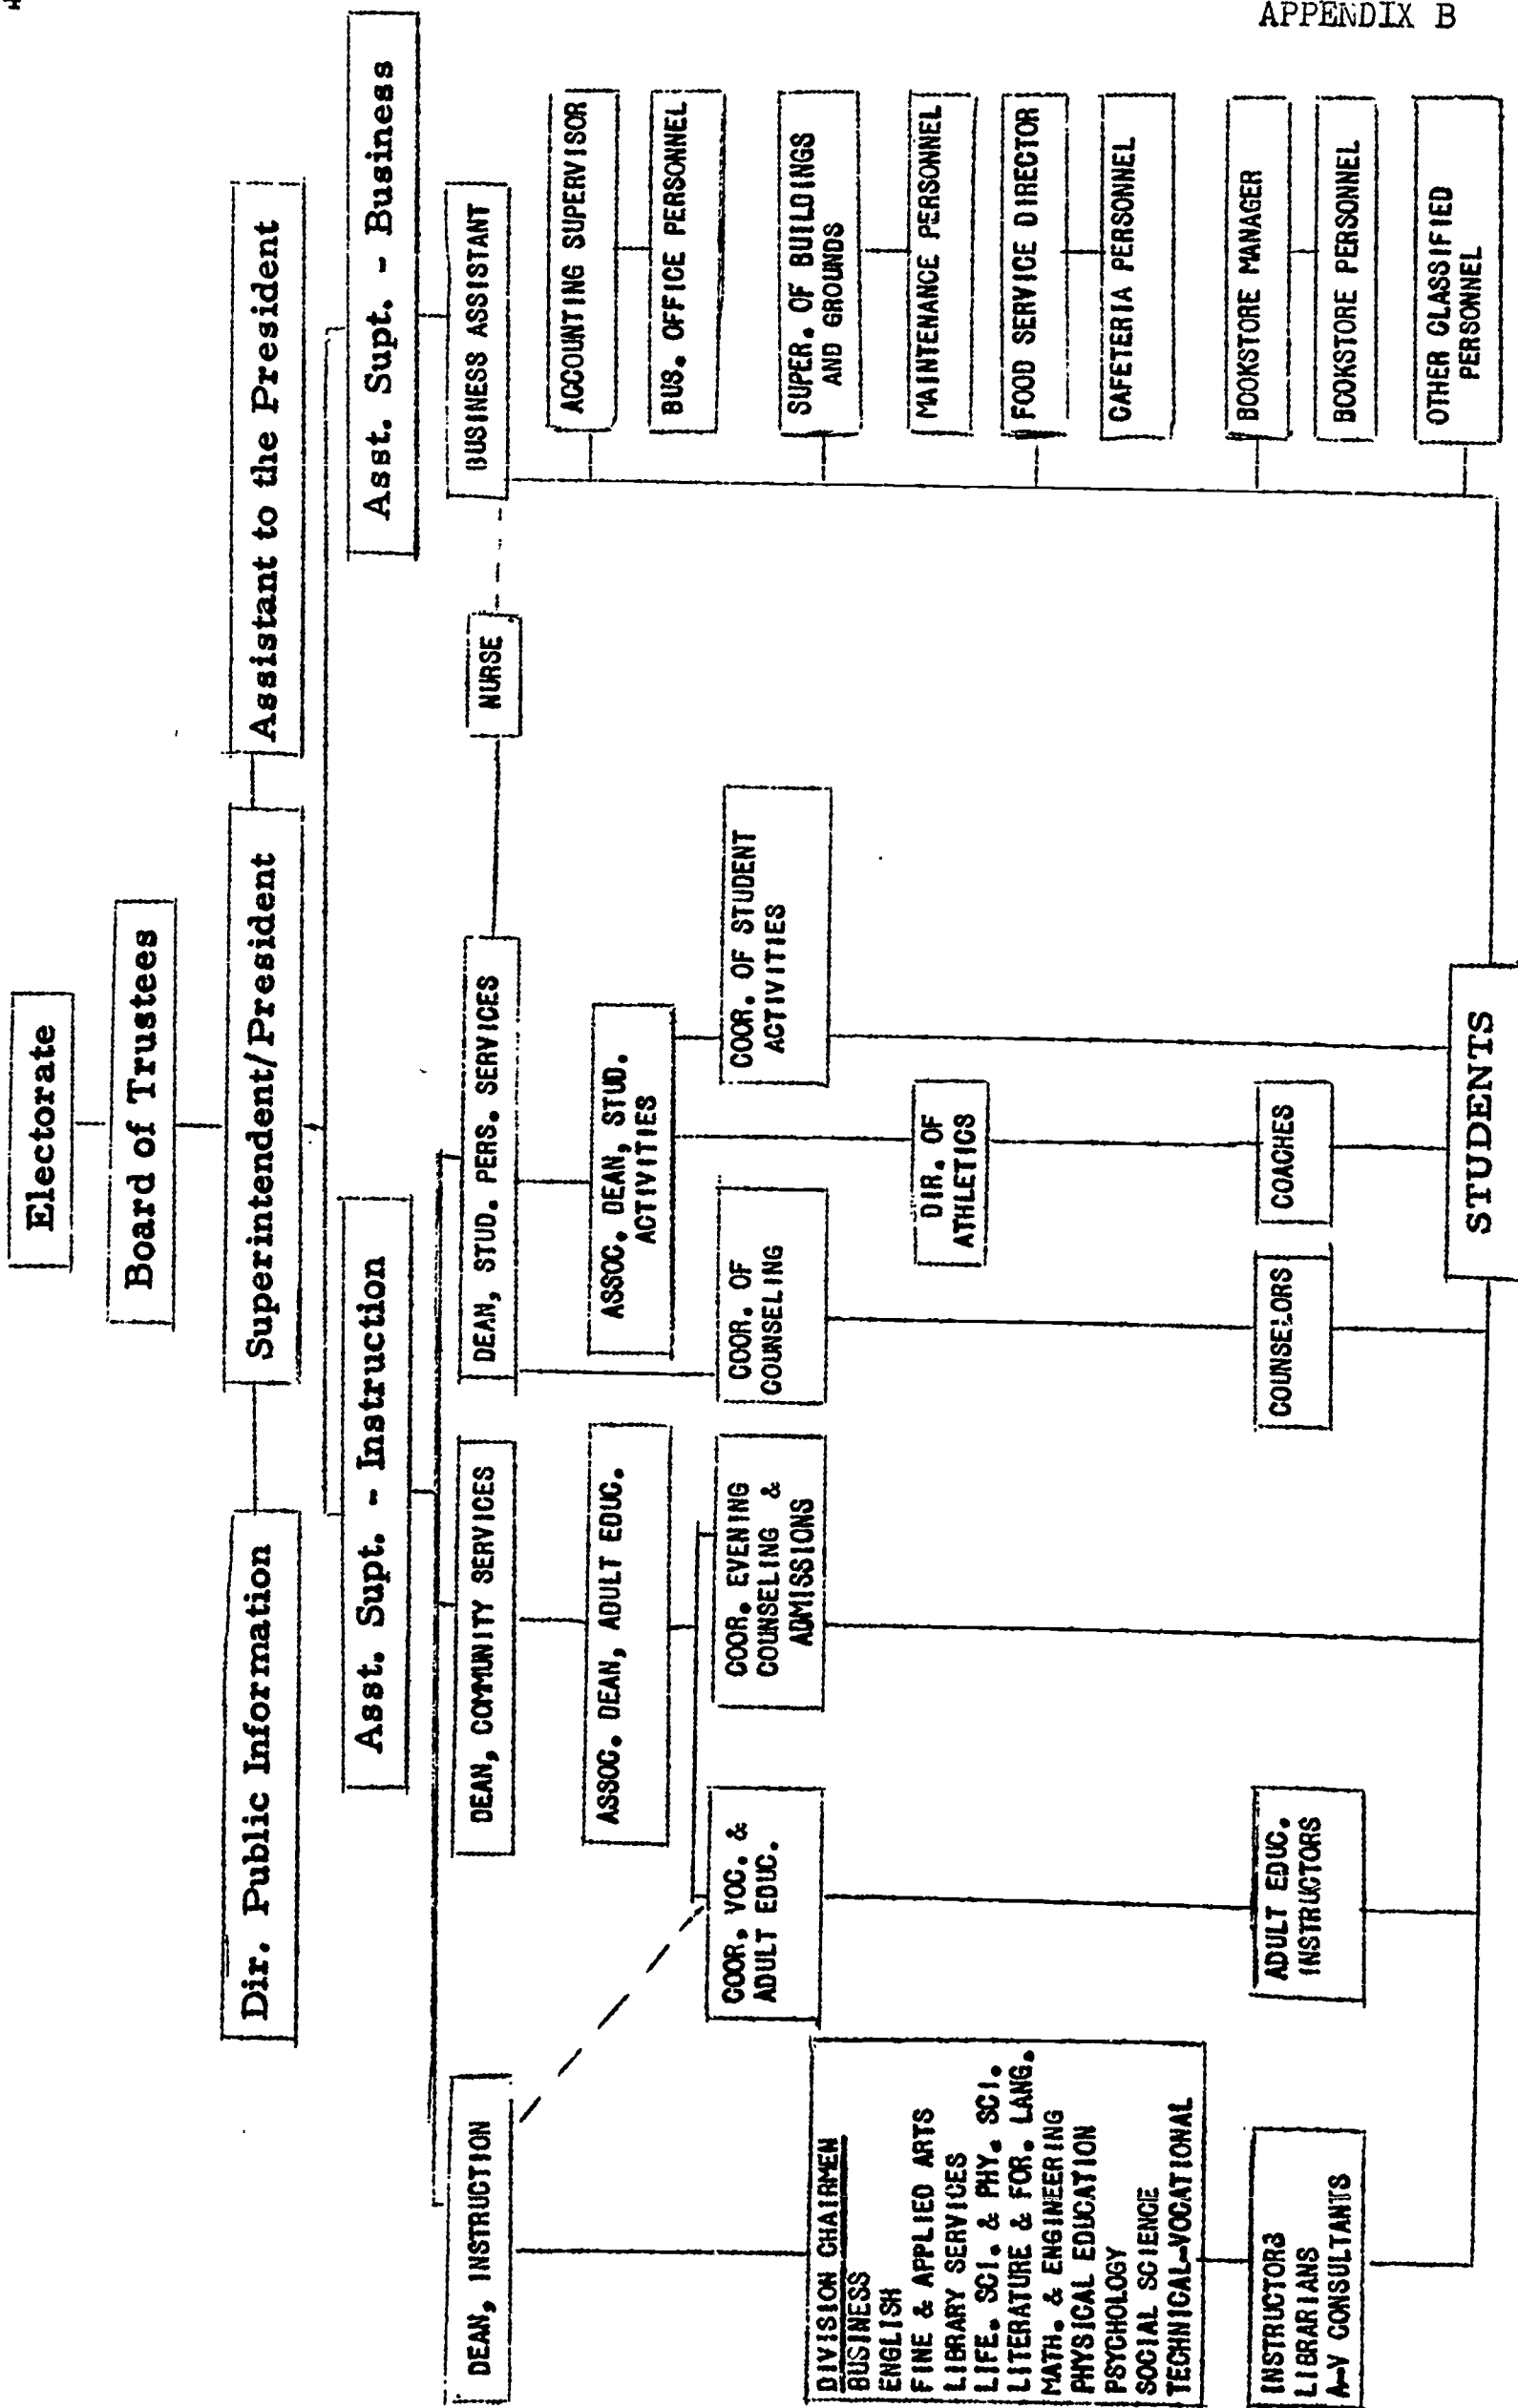

PLANNED FOR IMMEDIATE ACTION

The Final Report will be distributed to all participants.

A meeting of the student personnel administrative staff will be called to consider the findings and recommendations. It is anticipated that a long term program of action will be recommended for implementation to the Board of Trustees.

Young, Weills, Lyles, Aughinbaugh, E. Jones, Gallicchio, Mapes, Robinson

**FROM:** Robert E. Allerton, Dean of Student Personnel

**SUBJECT:** Self Study Committee

As you know, American River Junior College has been selected as one of the six junior colleges in the nation to serve as a Developmental Center for the national study of student personnel work sponsored by the Carnegie Foundation.

Phase I of the study requires, before December 15, 1964,

- A. A self study in depth.
- B. An outline of a student personnel project to be undertaken in depth. (By February 15th the project proposal is to be ready for presentation to the U.S. Office of Education for approval and, if approved, funds.)

Your help is needed in Phase IA at this time. A true self study must tap all facets of the college: administration, student personnel, all instructional divisions, classified staff, and, where possible, students. A general meeting of all participants has been called for the FACULTY HOUSE at 2:00 ON MONDAY, NOVEMBER 23, 1964. If you are unable to attend at that time, but are interested in participating, will you please contact my office so that arrangements can be made to reach you at a later time. Division Chairmen who are unable to attend may wish to send a representative from their division.

If you cannot participate because of other commitments, will you please contact my office so that a substitution can be made in your category.

**General Evaluation Team (2 hours per person)**

Kenneth D. Boettcher, President  
Douglas W. Burris, Dean of Instruction
